HIGH TECH QUALITY MANUFACTURING · SINCE 1898

Lambskin & Twisted Wool Polishing *Bonnets & Pads*

Kameltan s.a.r.l. is a specialized company manufacturing
a wide range of products from 100% genuine merinos
lambskin wool.

MANUFACTURED IN-HOUSE · LEBANON

WWW.KAMELTAN.COM

About Kameltan: Why Choose Our Pads

Founded in 1898, Kameltan owns and operates its own factories in Lebanon, controlling every stage of production, from lambskins and sheepskins to finished bonnets and pads.

Today the company is run by the **5th generation** of tanners from the Kamel family.

We are dedicated manufacturers of merinos lambskin and twisted wool polishing bonnets and pads, supplying distributors, wholesalers, detailing suppliers, body shops, and private-label partners worldwide.

Because we run our own production facilities, we manage the complete process under one roof. Our control begins at the source: we handle tanning for the merinos sheepskins and lambskins, then carry it through every step to confection and final bonnet and pad production. Nothing is outsourced, which means the quality, consistency, and cost of every pad stays in our hands.

These processes are our advantage. It lets us hold tight tolerances batch after batch, keep lead times reliable, and offer genuinely competitive wholesale pricing without compromising on the wool itself.

Despite the economic hardship of an unstable region, we are proud of where we stand today: one of the best in this industry worldwide. With long-standing experience in wool pad manufacturing, Kameltan is built for serious volume: dependable supply, repeatable quality, and flexible private-label and OEM programs for partners who want to build their own brand on a proven product.

Our pads are destined to be used for:

Automotive Industry

Yachts & Boats, Marine Industry

Airplanes & Trucks Industry

Marble, Stone, Wood & Steel Surfaces

Our competitive advantages:

i

Owned Factories

Our own plants in Lebanon, no third-party production.

ii

Full Control

Tanning, degreasing, confection & finishing handled in-house.

iii

Competitive Pricing

Owning every step keeps wholesale costs low and stable.

iv

Reliable Supply

Consistent quality and lead times built for volume orders.

Merinos Twisted & Tufted Wool Polishing & Buffing Bonnets

Our twin twisted-wool bonnet range: double-sided for maximum cut and single-side for balanced correction, both available as a softer 60% wool / 40% acrylic blend.

● Double-Sided

⚙️ THREADING & MOUNT

Standard thread from male 5/8" to female M14. This adapter is available for purchase to fit our pads, and creates spacing between the polisher and pad that keeps it from heating up.

◆ CLEANING TOOLS

A cleaning spur clears built-up compound and debris from the wool. Regular cleaning restores cut and extends pad life.

● Single-Side

○ AVAILABLE DIAMETERS

SIZE

1 inch / ø25.4 mm

2 inches / ø50.8 mm

3 inches / ø80 mm

5 inches / ø130 mm

6 inches / ø155 mm

7 inches / ø185 mm

8 inches / ø205 mm

9 inches / ø230 mm

Sizes apply to both Double-Sided and Single-Side bonnets.

Attaching the Polishing Bonnet

1. To avoid injury, always make sure the buffer/polisher is unplugged before attaching a bonnet.
2. Fit the bonnet completely over the backing pad and pull the string tight (see Figure 1).
3. Tie a bow knot, then tuck the knot and any loose string between the wool bonnet and the backing pad.

Note: Never allow a loose portion of the bonnet or its attachment strings to spin freely. Loose, spinning strings can entangle your fingers or snag on the workpiece.
